

FINAL REQUIREMENTS CHECKLIST

Once the panel has approved the final revisions of your capstone project (this includes the system and documentation), you will need to do/submit the following in order:

1. User's Manual. Create a separate document for your user manual according to your preferred template. [See sample user manual](#). Save your manual as PDF then convert to images (https://www.ilovepdf.com/pdf_to_jpg). A copy of the user's manual should be included in the Appendices.
2. Relevant Source Code. Create a separate document for your internal documentation according to your preferred template. Sample code snippet (not all) of your main module and algorithms implemented with proper comments explaining how the function(s)/code works. This section also includes the links to your full source file e.g. GitHub Repository. Make sure that this is a public repository. A copy of this should be included in the Appendices.

[Additional Requirements](#) for those who have clients [#3 to #5]:

3. Certificate of Completion. This indicates that you have turned over the research/project and user manual to the client and that you have conducted user training for the client.
4. Project Turnover and Acceptance Certificate (Sign-off form). This should be signed by the person who has accepted the project.
5. Photos of the conduct of user training and project turnover. The photos should show that user training has been conducted. On the other hand, for the project turnover, the photos should show the turnover of the user's manual and the signing of the project turnover forms.
6. Items 1 to 5 should be included before the Appendix for Curriculum Vitae (CV), thus the need to modify the pages on the Table of Contents and List of Appendices.
7. Final Review. Before submitting your final paper to your adviser for a thorough review, carefully edit the document. Double-check the verbs to ensure they are in the past tense and that they agree with the subject-verb agreement. Additionally, review the spelling for accuracy. Run your document through Grammarly to catch any grammatical errors. Once you have compiled the aforementioned items in your final paper, have your adviser sign the Capstone Routing Form (Step 1).
8. Complete the Declaration of Use of Gen-AI using the provided template [here](#). Include a scanned copy of the issued certification in the Appendices prior to submitting the Plagiarism Report.
9. Plagiarism Report. Secure a Similarity Test Certification for both the Proposal and Final Defense from your course instructor. Thereafter, proceed to the Research Utilization, Publication, and Information Dissemination Office, Research Building, WMSU, for the final issuance of the Similarity Certification. You will be provided with a copy of the plagiarism report and the certification. A scanned copy of the issued certification must be included in the Appendices.

Present the certificate to the faculty-in-charge for the signing of the Capstone Routing Form (Step 2).

10. Editing Certificate: This certification verifies that a document has undergone thorough proofreading. The certificate template can be found [here](#).

The editing services can be outsourced online or through freelance platforms, provided that the expert is an experienced proofreader and holds a master's degree in English Language

Present the certificate to the faculty-in-charge for the signing of the Capstone Routing Form (Capstone Routing Form Step 3).

You may skip this step if you plan to present and publish at an IEEE-sponsored conference. A separate certificate will be provided to you by the course instructor.

11. Presentation and Publication Preparation. All completed papers are encouraged to be presented and published at any flagship IEEE-sponsored international conference. Your full manuscript must be rewritten using the IEEE template ([refer to Publication-Conference-Template-A4](#)). The manuscript should be 5 to 6 pages long, including references. Note that your adviser will be listed as the last co-author.

The general structure of the paper is as follows:

1. Title Page: Title, author(s), affiliation(s), and contact details.
2. Abstract: A concise 150–250-word summary of your study.
3. Keywords: Include 3–5 keywords.
4. Main Sections:
 - a. Introduction
 - b. Related Studies
 - c. Methodology
 - d. Results and Discussion
 - e. Conclusion
5. References: Use IEEE citation style.

Please download [sample research papers](#) published by IEEE for reference. Once the manuscript is complete, send it to the course instructor for review and instructions on how to proceed with submission to an international conference.

If your paper is accepted for presentation and/or publication, note that registration and article processing fees are required. The fees will be divided among the researchers and the faculty adviser(s). The fees may vary from as low as 5,000 to 20,000 pesos. No fees shall be collected unless the paper is officially accepted for presentation and/or publication. Payment, presentation and publication may also happen even after your graduation depending on the timeline set by the respective organizers of the conferences.

If your paper is declined, you will be required to present it at the [college's annual research forum](#) (#12). Students with paper accepted for international presentation and/or publication may still participate in the college forum if they wish to.

12. Capstone Presentation and Poster Creation. **ALL STUDENT RESEARCHERS** are mandated to present their papers at the college's annual research forum if their paper is declined for international presentation and publication. The date of which is yet to be decided. Accepted papers for international presentation may skip this step. This usually happens in March or April. As a prerequisite, the creation of a Capstone Poster is mandatory. This is the summarized version of your paper (Abstract, Introduction, Statement of the Problem, Objectives, Significance, Methodology, Results and Discussion, Conclusion and

Recommendation, User Interface). The poster dimensions must be 24 inches by 72 inches (300 dpi). See poster template.

During the forum, awards will be given for Best Capstone, Best Presenter, and Best Poster. Therefore, it is crucial to craft an impactful and visually appealing poster. You may ask your adviser for comments. Additionally, each student is required to print their capstone poster on tarpaulin (2 x 6 feet) and set it up on a stand for proper display during the event. See sample stand.

Requirements on College's Forum

1. Capstone Poster on tarp ([see template](#) and [sample](#))
2. Poster Stand ([see photo](#))
3. IEEE Manuscript ([see sample](#))
4. PowerPoint Presentation
5. Video Presentation, maximum of 3 mins.
(<https://youtu.be/ivcajaH6430>)

You may proceed to #13 provided you have to submit your poster and complete step #11.

13. Code Inspection: The output of your capstone, research, or project, such as the full source code (on GitHub), software package (installer), IoT devices, etc., must be submitted to the faculty-in-charge. This will be thoroughly checked to ensure that the research conforms to the Honor Code as outlined in the Student Handbook (Capstone Routing Form Step 4). Additionally, all source code must be converted into a pdf format (1 file not 1 page) for submission on this step.
14. Capstone Archiving: Your completed manuscript, shorten paper for publication, poster, GitHub link, software packages, IoT devices, etc., must be submitted to the faculty-in-charge thru email for archiving. WAIT FOR THE PDF FORMAT OF YOUR DOCUMENT AND THE TEMPLATE FOR HARDBOUND COVER to be emailed to you. (Capstone Routing Form Step 5).

In your shared Google Drive, upload the ff:

1. Final Manuscript in docx format
2. Shorten Manuscript (4 to 6 pages) - [see sample](#)
3. Plagiarism Certificate
4. Link to the GitHub Repo (Public)
5. Source Code in PDF
6. PowerPoint Presentation
7. Video Presentation ([see sample](#) max. 3 mins)

Item 8 and 9 are required if paper is NOT ACCEPTED for international presentation and publication

8. Proofreading Certificate
9. Capstone Poster ([see template](#) and [sample](#)) Additional if applicable
10. App installer (APK, exe, link to the website)
11. Data Collected (ML)
12. Model (Jupyter Notebook – can be in GitHub as well)
13. IoT – may be surrendered to the CS Department

Take note of the Final List of Appendices

1. Appendix A: Data Collected
2. Appendix B: System Design
3. Appendix C: Evaluation Tool

4. Appendix D: Relevant Source Code
5. Appendix E: Ethical Clearance
6. Appendix F: Declaration of Use of Gen-AI
7. Appendix G: Plagiarism Report
8. Appendix H: Research Critique and Editing Certificate
9. Appendix I: User's Manual
10. Appendix J: Curriculum Vitae

Additional of applicable (must be inserted before Appendix J.

11. Appendix J: Certificate of Completion
12. Appendix K: Project Turnover and Acceptance Certificate
13. Appendix L: Photo Documentation
- 14. Appendix M: Curriculum Vitae**

15. **At least 3 copies** of the document in hard-bound, maroon color. The size of the paper is short bond paper. The print is one-sided.

If your paper is accepted for publication and will proceed for publication, you only need to submit **1 copy** of the hardbound.

16. Once you are ready for hardbound submission, simply proceed to the Dean's Office for additional instructions regarding the distribution of your hardbound documents.
17. You may now claim your Capstone Certification, a requirement for filing your application for graduation and the Transcript of Record (TOR) at the Dean's Office.
