

Semester-End Activity: Future Profession Portfolio Website

Activity Overview

For your semester-end activity, you will create a simple portfolio website that showcases your future profession and career aspirations 5–10 years from now.

This activity allows you to creatively present:

- who you want to become,
- the skills you aim to develop,
- your future goals,
- and how technology may shape your chosen profession.

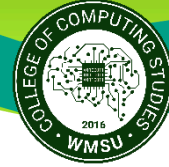

You are **not required to code a website from scratch**. Instead, you may use beginner-friendly website builders and templates to help you create a professional-looking portfolio website quickly and easily.

Think of this as your “future digital identity.” Main character energy, but professional.

Objective

By the end of this activity, you should be able to:

- Create a functional and visually appealing portfolio website
- Present your future profession and career goals creatively
- Apply basic principles of design, organization, and digital presentation
- Use modern web creation tools effectively

Website Content Requirements

Your website must include the following sections/pages:

1. Homepage

Include:

- Your name
- Your future profession/title
(*Examples: Future Doctor, Marine Biologist, Registered Nurse, Environmental Scientist, Pharmacist, Teacher, Entrepreneur, etc.*)
- A short introduction about yourself
- A professional tagline or personal motto

Example:

“Creating healthier communities through science and compassion.”

2. About Me

Discuss:

- Your interests and passions
- Why you chose your future profession
- Your goals for the next 5–10 years
- Your dream workplace, specialization, or career path

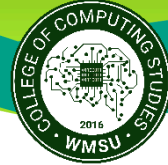

3. Skills and Strengths

List at least:

- 3 skills you currently have
- 3 skills you want to improve or learn

You may include:

- Communication skills
- Leadership
- Research skills
- Public speaking
- *Other*

4. Future Projects or Career Vision

Showcase:

- Your dream projects
- Future research ideas
- Advocacy or causes you want to support
- Innovations or contributions you hope to make in your field

Be creative and realistic.

5. Gallery / Multimedia Section

Include:

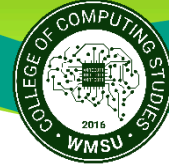

- photos,
- illustrations,
- inspiration boards,
- short videos,
- icons,
- or career-related visuals

This section should make your website more engaging and visually appealing.

6. Contact Page

Include at least:

- email address
- social media links (optional)
- a short message form or “Contact Me” section

Design Requirements

Your website should:

- Have a clean and organized layout
- Use consistent colors, fonts, and spacing
- Be visually appealing and professional
- Be easy to navigate
- Be compatible on both mobile and desktop view
- Include multimedia elements when possible

Submission Requirements

Submit a **single PDF file** containing:

1. Screenshots of all website pages/sections
2. The link to your published website

Recommended Website Builders

You may use any of the following beginner-friendly platforms:

- [Wix](#)
- [Canva Website Builder](#)
- [Google Sites](#)
- [WordPress.com](#)
